

November 18, 1964

Mr. Clement B. Adams
Water Commissioner
Cedar Valley Distribution System
162 South 400 East
Cedar City, Utah

Dear Mr. Adams:

Joe Melling called after your discussion and inquired about the acre-foot withdrawal limitation in Cedar City Valley and the type of records needed.

A column should be included in your 1964 report showing the individual acre-foot per acre withdrawal of each irrigator similar to your last year's report.

For assessment purposes, will you please revise column 8 from decreed acreage to quantity to be assessed. In this column, you can then add the acre-foot figure to be charged against each right. This figure should not include any acre-feet that is charged against an association, such as Bulldog well etc.

In addition, I believe a letter should be sent by the commissioner to those who over-pumped. It should be pointed out that their acre-foot withdrawal exceeded the 3 acre-feet per acre limitation under the adjudication. This would be useful to the water users in planning future operations when the adjudication terms will be enforced.

Enclosed for your consideration is a proposed letter which might be sent to such users if agreeable with you.

Yours very truly,

Donald C. Norseth
Distribution Engineer

DCE/vh
Enclosure
CC: Mr. Joe Melling

_____:

Compilation of the 1964 water delivery records for Cedar Valley is being made for the annual report.

Your individual account shows the following:

1. Estimated irrigated acreage _____
2. 1964 acre-foot withdrawal _____
3. Acre-foot per acre use _____

If you have exceeded 3 acre-feet withdrawal per acre of irrigation, you should rectify your farming practice so as to conform with the established acre-foot limitation.

We trust this will assist you in evaluating your water use and in making improvements when necessary.

Yours very truly,

DCM/vh

Wayne D. Criddle
STATE ENGINEER

Bauer, Clyne (Dennis Bauer) (Dennis Bauer)	64	313.81	17.29	625.25	140	607.96	4.47	Combined with W.U.C. 425 on same acreage irrigated 29 acres twice-44 acres leveled, no water.

Account no 1 through 9 assigned to surface water diversions from Coal Creek
Based on total deliveries to company and the proportion of the shares owned by the water user.
Assessment on surface water use is leveled against irrigation company.
Estimated with the help of water user.
Users with interest in joint wells and/or irrigation companies are not to be assessed individually
unless they have other rights.
Total water delivered to farm divided by acreage reported as irrigated in 1964.
